Description

Application:

- indoors
- for heating residential and commercial spaces, such as basements, garages, workshops, etc.
- when the temperature knob is set to minimum, the device can be used as a fan without the heating function
- The thermostat controls the operation of the heating element so that the room temperature remains at the same level.

Attention! In order to extend the life of the heater's heating element, our device is equipped with an appropriate thermostat and after reaching the required temperature,

it switches to a short cooling mode of the heating plate, and after a while returns to the room heating mode.

This is the correct operation of the device.

Parameters

- Power: 3 kW
- Supply voltage:220-240V, 50Hz
- Settings: 25/1500/3000 W
- Network security required: 16A
- Auto-off temperature: 85°C
- Capacity: 280 m3/h
- Room volume: 30 m3
- Device dimensions:265*209*293 mm
- Net weight: 2.9 kg
